Material Safety Data Sheet
Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxxx.x SERIES ALLOYS
ID: 689

*** Section 1 - Chemical Product and Company Identification ***

Chemical Formula: Mixture
Product Use: Various fabricated aluminum parts and products.

Alcoa Inc.
201 Isabella Street
Pittsburgh, PA 15212-5858

Phone: Health and Safety: 1-412-553-4649

Emergency Information: USA: Chemtrec: 1-800-424-9300 or 1-703-527-3887
Alcoa: 1-412-553-4001

Website: For a current MSDS, refer to Alcoa websites: www.alcoa.com or Internally at my.alcoa.com EHS Community

*** Section 2 - Hazards Identification ***

EMERGENCY OVERVIEW
Solid. Silvery. Odorless. Non-combustible as supplied. Small chips, fine turnings and dust from processing may be readily ignitable.

Explosion/fire hazards may be present when (See Sections 5, 7 and 10 for additional information):
* Dust or fines are dispersed in the air.
* Chips, dust or fines are in contact with water.
* Dust or fines are in contact with certain metal oxides (e.g. rust).
* Molten metal is in contact with water/moisture or certain metal oxides (e.g. rust).

Dust and fume from processing can cause irritation of eyes, skin and upper respiratory tract and metallic fume fever.

POTENTIAL HEALTH EFFECTS
The following statements summarize the health effects generally expected in cases of overexposures. User specific situations should be assessed by a qualified individual. Additional health information can be found in Section 11.

The health effects listed below are not likely to occur unless processing of this product generates dust or fumes.

Eyes
Dust or fume from processing: Can cause irritation.

Skin
Dust or fume from processing: Can cause irritation.

Inhalation
Health effects from mechanical processing (e.g., cutting, grinding): Can cause irritation of respiratory tract.
Chronic overexposures: Can cause reduction in the number of red blood cells (anemia), skin abnormalities (pigmentation changes), central nervous system damage, secondary Parkinson's disease and reproductive harm in males.
Additional health effects from elevated temperature processing (e.g., welding, melting): Acute overexposures: Can cause nausea, fever, chills, shortness of breath and malaise (metal fume fever), the accumulation of fluid in the lungs (pulmonary edema) and reduced ability of the blood to carry oxygen (methemoglobin). Chronic overexposures: Can cause respiratory sensitization, scarring of the lungs (pulmonary fibrosis) and lung cancer.
Material Safety Data Sheet

Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxxx.x SERIES ALLOYS

Carcinogenicity and Reproductive Hazard

Product as shipped: Does not present any cancer or reproductive hazards.
Dust and fumes from mechanical processing: Can present a cancer hazard (nickel, lead). Can present a reproductive hazard (manganese, lead).
Dust and fumes from welding or elevated temperature processing: Can present a cancer hazard (hexavalent chromium, lead compounds, nickel compounds, welding fumes). Can present a reproductive hazard (manganese, lead).

Medical Conditions Aggravated By Exposure to Product, Components or Compounds Formed During Processing
Dust or fume from processing: Asthma, chronic lung disease, skin rashes and secondary Parkinson's disease.

*** Section 3 - Composition / Information on Ingredients ***

Complete composition is provided below and may include some components classified as non-hazardous.

Component Information
*Alloy CD79 and C594.
Additional compounds which may be formed during processing are listed in Section 8.

*** Section 4 - First Aid Measures ***

First Aid: Eyes
Dust or fume from processing: Flush eyes with plenty of water or saline for at least 15 minutes. Consult a physician.

First Aid: Skin
Dust or fume from processing: Wash skin with soap and water for at least 15 minutes. Consult a physician if irritation persists.

First Aid: Inhalation
Dust or fume from processing: Remove to fresh air. If unconscious or severely injured, check for clear airway, breathing and presence of pulse. Perform CPR if there is no pulse or respiration. Consult a physician.

*** Section 5 - Fire Fighting Measures ***

Flammable/Combustible Properties
This product does not present fire or explosion hazards as shipped. Small chips, turnings, dust and fines from processing may be readily ignitable.

Fire/Explosion
May be a potential hazard under the following conditions:
* Dust or fines dispersed in the air can be explosive. Even a minor dust cloud can explode violently. Dust accumulation on the floor, ledges and beams can present a risk of ignition, flame propagation and secondary explosions.
* Chips, dust or fines in contact with water can generate flammable/explosive hydrogen gas. Hydrogen gas could present an explosion hazard in confined or poorly ventilated spaces.
* Dust or fines in contact with certain metal oxides (e.g., rust). A thermite reaction, with considerable heat generation, can be initiated by a weak ignition source.
Material Safety Data Sheet
Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxx.xx SERIES ALLOYS

* Molten metal in contact with water/moisture or other metal oxides (e.g., rust, copper oxide). Moisture entrapped by molten metal can be explosive. Contact of molten aluminum with other metal oxides can initiate a thermite reaction. Finely divided metals (e.g., powders or wire) may have enough surface oxide to produce thermite reactions/explosions.

Extinguishing Media
Use Class D extinguishing agents on dusts, fines or molten metal. Use coarse water spray on chips and turnings.

Unsuitable Extinguishing Media
DO NOT USE:
* Halogenated agents on small chips, dusts or fines.
* Water around molten metal.
These agents will react with the burning material.

Fire Fighting Equipment/Instructions
Fire fighters should wear NIOSH approved, positive pressure, self-contained breathing apparatus and full protective clothing when appropriate.

*** Section 6 - Accidental Release Measures ***

Small/Large Spill
If molten: Contain the flow using dry sand or salt flux as a dam. Do not use shovels or hard tools to halt the flow of molten aluminum. Allow the spill to cool before remelting as scrap.

*** Section 7 - Handling and Storage ***

Handling/Storage
Product should be kept dry. Avoid generating dust. Avoid contact with sharp edges or heated metal. Hot and cold aluminum are not visually different. Hot aluminum does not necessarily glow red.

Requirements for Processes Which Generate Dusts or Fines
If processing of these products includes operations where dust or extremely fine particulate is generated, obtain and follow the safety procedures and equipment guides contained in Aluminum Association Bulletin F-1 and National Fire Protection Association (NFPA) brochures listed in Section 16. Cover and reseal partially empty containers. Use non-sparking handling equipment. Provide grounding and bonding where necessary to prevent accumulation of static charges during dust handling and transfer operations. (See Section 15). Local ventilation and vacuum systems must be designed to handle explosive dusts. Dry vacuums and electrostatic precipitators must not be used. Dust collection systems must be dedicated to aluminum dust only and should be clearly labeled as such. Do not co-mingle fines of aluminum with fines of iron, iron oxide (rust) or other metal oxides.

Do not allow chips, fines or dust to contact water, particularly in enclosed areas. Avoid all ignition sources. Good housekeeping practices must be maintained. Do not use compressed air to remove settled material from floors, beams or equipment.

Requirements for Remelting of Scrap Material and/or Ingot
Molten metal and water can be an explosive combination. The risk is greatest when there is sufficient molten metal to entrap or seal off the water. Water and other forms of contamination on or contained in scrap or remelt ingot are known to have caused explosions in melting operations. While the products may have minimal surface roughness and internal voids, there remains the possibility of moisture contamination or entrapment. If confined, even a few drops of water can lead to violent explosions.

All tooling and containers which come in contact with molten metal must be preheated or specially coated and rust free. Molds and ladles must be preheated or oiled prior to casting. Any surfaces that may contact molten metal (e.g., concrete) should be specially coated.

Drops of molten metal in water (e.g. from plasma arc cutting), while not normally an explosion hazard, can generate enough flammable hydrogen gas to present an explosion hazard. Vigorous circulation of the water and removal of the particles minimize the hazards.
Material Safety Data Sheet
Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxxx.x SERIES ALLOYS

During melting operations, the following minimum guidelines should be observed:
* Inspect all materials prior to furnace charging and completely remove surface contamination such as water, ice, snow, deposits of grease and oil or other surface contamination resulting from weather exposure, shipment, or storage.
* Store materials in dry, heated areas with any cracks or cavities pointed downwards.
* Preheat and dry large or heavy items such as ingot adequately before charging into a furnace containing molten metal. This is typically done by use of a drying oven or homogenizing furnace. The drying cycle should bring the internal metal temperature of the coldest item of the batch to 400°F and then hold at that temperature for 6 hours.

*** Section 8 - Exposure Controls / Personal Protection ***

Engineering Controls
If dust or fumes are generated through processing: Use with adequate explosion-proof ventilation to meet the limits listed in Section 8, Exposure Guidelines.

Personal Protective Equipment

Respiratory Protection
If dust or fumes are generated through processing: Use NIOSH-approved respiratory protection as specified by an Industrial Hygienist or other qualified professional if concentrations exceed the limits listed in Section 8, Exposure Guidelines. Suggested respiratory protection: N95, N100 for lead.

Eye Protection: Wear safety glasses/goggles to avoid eye injury.
Skin Protection: Wear appropriate gloves to avoid any skin injury.
General
Sampling to establish lead exposures is advised where exposures to airborne particulate or fumes are possible. Consult OSHA Lead Standard 29 CFR 1910.1026 for specific health/industrial hygiene precautions and requirements to follow when handling lead compounds.

Personnel who handle and work with molten metal should utilize primary protective clothing like polycarbonate face shields, fire resistant tapper's jackets, neck shades (snoods), leggings, spats and similar equipment to prevent burn injuries. In addition to primary protection, secondary or day-to-day work clothing that is fire resistant and sheds metal splash is recommended for use with molten metal. Synthetic materials should never be worn even as secondary clothing (undergarments).

Exposure Guidelines

A: General Product Information
Alcoa recommends an Occupational Exposure Limit for Chromium (VI) Compounds [both soluble and insoluble forms] of 0.25 ug/m³ TWA as chromium.
Alcoa recommends an Occupational Exposure Limit for Nickel Compounds of 0.1 mg/m³ TWA.
Alcoa recommends Occupational Exposure Limits for Manganese of 0.05 mg/m³ TWA (total particulate) and 0.02 mg/m³ TWA (respirable fraction).

B: Component Exposure Limits
Aluminum (7429-90-5)
  ACGIH 10 mg/m³ TWA (metal dust)
  OSHA 15 mg/m³ TWA (total dust); 5 mg/m³ TWA (respirable fraction)
Silicon (7440-21-3)
  OSHA 15 mg/m³ TWA (total dust); 5 mg/m³ TWA (respirable fraction)
Copper (7440-80-8)
  ACGIH 0.2 mg/m³ TWA (fume); 1 mg/m³ TWA (dust and mist, as Cu)
  OSHA 0.1 mg/m³ TWA (fume); 1 mg/m³ TWA (dust and mist)
Manganese (7439-86-5)
  ACGIH 0.2 mg/m³ TWA
  OSHA 5 mg/m³ Ceiling (fume)
Chromium (7440-47-3)
  ACGIH 0.5 mg/m³ TWA
  OSHA 1 mg/m³ TWA
Material Safety Data Sheet

Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxxx.x SERIES ALLOYS

Lead* (7439-92-1)
AGCH 0.05 mg/m³ TWA
OSHA 50 µg/m³ TWA
OSHA 50 µg/m³ TWA (as Pb); 30 µg/m³ Action Level (as Pb. Poison - see 29 CFR 1910.1025)

Nickel (7440-02-0)
AGCH 1.5 mg/m³ TWA (Inhalable fraction)
OSHA 1 mg/m³ TWA

C: Exposure Limits for Additional Compounds Which May Be Formed During Processing

Alumina (non-fibrous) (1344-28-1)
AGCH 10 mg/m³ TWA (particulate matter containing no asbestos and <1% crystalline silica)
OSHA 15 mg/m³ TWA (total dust); 5 mg/m³ TWA (respirable fraction)

Silica fume (amorphous) (69012-64-2)
OSHA (80)% SiO₂ mg/m³ TWA

Magnesium oxide fume (1309-48-4)
AGCH 10 mg/m³ TWA (inhalable fraction)
OSHA 15 mg/m³ TWA (total particulate)

Manganese compounds, Inorganic (Not Available)
AGCH 0.2 mg/m³ TWA (as Mn)
OSHA 5 mg/m³ Ceiling (as Mn)

Iron oxide (1309-37-1)
AGCH 5 mg/m³ TWA (respirable fraction)
OSHA 10 mg/m³ TWA

Zinc oxide (1314-13-2)
AGCH 2 mg/m³ TWA (respirable fraction)
AGCH 10 mg/m³ STEL (respirable fraction)
OSHA 5 mg/m³ TWA (fume); 15 mg/m³ TWA (total dust); 5 mg/m³ TWA (respirable fraction)

Nickel Insoluble compounds (Not Available)
AGCH 0.2 mg/m³ TWA (inhalable fraction, as Ni)
OSHA 1 mg/m³ TWA (as Ni)

Lead, Inorganic compounds (Not Available)
AGCH 0.05 mg/m³ TWA (as Pb)

Chromium (II) compounds (Not Available)
OSHA 0.5 mg/m³ TWA (as Cr)

Chromium (III) compounds (as Cr) (Not Available)
AGCH 0.5 mg/m³ TWA (as Cr)
OSHA 0.5 mg/m³ TWA (as Cr)

Chromium (VI) compounds - water soluble (Not Available)
AGCH 0.05 mg/m³ TWA (as Cr)

Chromium (VI) compounds (certain water Insoluble forms) (Not Available)
AGCH 0.01 mg/m³ TWA (as Cr)

Chromium (VI) (18540-29-8)
OSHA 2.5 µg/m³ Action Level; 5 µg/m³ TWA (Cancer hazard - See 29 CFR 1910.1026)

Ozone (10028-16-8)
AGCH 0.05 ppm TWA (heavy work); 0.08 ppm TWA (moderate work); 0.10 ppm TWA (light work); 0.20 ppm TWA (heavy, moderate or light workloads, <=2 hours)
OSHA 0.1 ppm TWA; 0.2 mg/m³ TWA

Nitrogen dioxide (10102-44-0)
AGCH 3 ppm TWA
AGCH 5 ppm STEL
OSHA 5 ppm Ceiling; 9 mg/m³ Ceiling

Nitric oxide (10102-43-9)
AGCH 25 ppm TWA
OSHA 25 ppm TWA; 30 mg/m³ TWA

*** Section 10 - Chemical Stability & Reactivity Information ***

Stability
Stable under normal conditions of use, storage, and transportation as shipped.

Conditions to Avoid
Chips, fines, dust and molten metal are considerably more reactive with the following:
* Water: Slowly generates flammable/explosive hydrogen gas and heat. Generation rate is greatly increased with smaller particles (e.g., fines and dusts). Molten metal can react violently/explosively with water or moisture, particularly when the water is entrapped.
* Heat: Oxidizes at a rate dependent upon temperature and particle size.
* Strong oxidizers: Violent reaction with considerable heat generation. Can react explosively with nitrates (e.g., ammonium nitrate and fertilizers containing nitrate) particularly when heated or molten.
* Acids and alkalis: Reacts to generate flammable/explosive hydrogen gas. Generation rate is greatly increased with smaller particles (e.g., fines and dusts).
* Halogenated compounds: Many halogenated hydrocarbons, including halogenated fire extinguishing agents, can react violently with finely divided aluminum.
* Iron oxide (rust) and other metal oxides (e.g., copper and lead oxides): A violent thermite reaction generating considerable heat can occur. Reaction with aluminum fines and dusts requires only very weak ignition sources for initiation. Molten aluminum can react violently with iron oxide without external ignition source.
* Iron powder and water: An explosive reaction forming hydrogen gas occurs when heated above 1470°F (800°C).

Thermite explosions have been reported when aluminum alloys were melted in furnaces used for alloying with lead, bismuth or other metals with low melting temperatures. These metals, when added as high purity ingots, can seep through cracks in furnace liners and become oxidized. During subsequent melts in the furnace, molten aluminum can contact these metal oxides resulting in a thermite explosion.

*** Section 11 - Toxicological Information ***

Health Effects Associated with Individual Ingredients
Chromium dust and mist Can cause irritation of eyes, skin and respiratory tract. Chromium and trivalent chromium IARC/NTP: Not classified by IARC.

Nickel dust and fumes Can cause irritation of eyes, skin and respiratory tract. **Eye contact:** Can cause inflammation of the eyes and eyelids (conjunctivitis). **Skin contact:** Can cause sensitization and allergic contact dermatitis. Chronic overexposures: Can cause perforation of the nasal septum, inflammation of the nasal passages (sinusitis), respiratory sensitization, asthma and scarring of the lungs (pulmonary fibrosis). **Nickel alloys IARC/NTP:** Reviewed but not recommended for listing by the NTP. Listed as possibly carcinogenic to humans by IARC (Group 2B).
Material Safety Data Sheet

Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxxx.x SERIES ALLOYS

Id: 689

Lead dust or fume Can cause irritation of eyes and upper respiratory tract. **Acute overexposures:** Can cause nausea and muscle cramps. **Chronic overexposures:** Can cause weakness in the extremities (peripheral neuropathy), abdominal cramps and other gastrointestinal tract effects, kidney damage, liver damage, central nervous system damage, damage to blood forming organs, blood cell damage and reproductive harm. Can cause reduced fertility and fetal toxicity in pregnant women. **IARC/NTP:** Listed as "reasonably anticipated to be a human carcinogen" by the NTP. Listed as possibly carcinogenic to humans by IARC (Group 2B)*.

Copper dust and mists Can cause irritation of eyes, mucous membranes, skin and respiratory tract. **Chronic overexposures:** Can cause reduction in the number of red blood cells (anemia), skin abnormalities (pigmentation changes) and hair discoloration.

Manganese dust or fumes **Chronic overexposures:** Can cause inflammation of the lung tissue, scarring of the lungs (pulmonary fibrosis), central nervous system damage, secondary Parkinson's disease and reproductive harm in males.

Silicon, inert dusts **Chronic overexposures:** Can cause chronic bronchitis and narrowing of the airways.

Aluminum dust, fumes and fumes Low health risk by inhalation. Generally considered to be biologically inert (milling, cutting, grinding).

Health Effects Associated with Individual Compounds Formed During Processing

(The following could be expected if welded, remelted or otherwise processed at elevated temperatures.)

Hexavalent chromium (Chrome VI) **Can cause irritation of eyes, skin and respiratory tract. Skin contact:** Can cause irritant dermatitis, allergic reactions and skin ulcers. **Chronic overexposures:** Can cause perforation of the nasal septum, respiratory sensitization, asthma, the accumulation of fluid in the lungs (pulmonary edema), lung damage, kidney damage, lung cancer, nasal cancer and cancer of the gastrointestinal tract. **IARC/NTP:** Listed as "known to be a human carcinogen" by the NTP. Listed as carcinogenic to humans by IARC (Group 1)*.

Nickel compounds Associated with lung cancer, cancer of the vocal cords and nasal cancer. **IARC/NTP:** Listed as "known to be a human carcinogen" by the NTP. Listed as carcinogenic to humans by IARC (Group 1)*.

Certain inorganic lead compounds: **IARC/NTP:** Listed as "reasonably anticipated to be a human carcinogen" by the NTP. Listed as probably carcinogenic to humans by IARC (Group 2A)*.

Copper fume Can cause irritation of eyes, mucous membranes and respiratory tract. **Acute overexposures:** Can cause nausea, fever, chills, shortness of breath and malaise (metal fume fever).

Magnesium oxide fumes Can cause irritation of eyes and respiratory tract. **Acute overexposures:** Can cause nausea, fever, chills, shortness of breath and malaise (metal fume fever).

Manganese oxide fumes Can cause irritation of eyes, skin and respiratory tract. **Acute overexposures:** Can cause nausea, fever, chills, shortness of breath and malaise (metal fume fever).

Zinc oxide dust Expected to be a low health risk by inhalation. **Zinc oxide fumes** Can cause irritation of upper respiratory tract. **Acute overexposures:** Can cause nausea, fever, chills, shortness of breath and malaise (metal fume fever).

Iron oxide **Chronic overexposures:** Can cause benign lung disease (siderosis). **Ingestion:** Can cause irritation of gastrointestinal tract, bleeding, changes in the pH of the body fluids (metabolic acidosis) and liver damage.

Silica, amorphous **Acute overexposures:** Can cause dryness of eyes, nose and upper respiratory tract.

Alumina (aluminum oxide) Low health risk by inhalation. Generally considered to be biologically inert.
Welding, plasma arc cutting, and arc spray metalizing can generate ozone. Ozone Can cause irritation of eyes, nose and upper respiratory tract. Acute overexposures: Can cause shortness of breath, tightness of chest, headache, cough, nausea and narrowing of airways. Effects are reversible on cessation of exposure. Acute overexposures (high concentrations): Can cause respiratory distress, respiratory tract damage, bleeding and the accumulation of fluid in the lungs (pulmonary edema). Effects can be delayed up to 1-2 hours. Additional Information: Studies with experimental animals by inhalation have found genetic damage, reproductive harm, blood cell damage, lung damage and death.

Welding fumes IARC/NTP: Listed as possibly carcinogenic to humans by IARC (Group 2B)*.

Plasma arc cutting can generate oxides of nitrogen. Oxides of nitrogen (NO and NO₂) Can cause irritation of eyes, skin and respiratory tract. Acute overexposures: Can cause reduced ability of the blood to carry oxygen (methemoglobin). Can cause cough, shortness of breath, the accumulation of fluid in the lungs (pulmonary edema) and death. Effects may be delayed up to 2-3 weeks. Nitrogen dioxide (NO₂) Chronic overexposures: Can cause scarring of the lungs (pulmonary fibrosis).

### Acute Toxicity of Ingredients/Formed Compounds

#### A: General Product Information

No information available for product.

#### B: Component Analysis - LD50/LC50

- Silicon (7440-21-3)
- Oral LD50 Rat: 3160 mg/kg
- Magnesium (7439-95-4)
- Oral LD50 Rat: 230 mg/kg
- Iron (7439-85-6)
- Oral LD50 Rat: 984 mg/kg
- Manganese (7439-95-5)
- Oral LD50 Rat: 9 g/kg
- Nickel (7440-02-0)
- Oral LD50 Rat: >5000 mg/kg

#### C: Formed Compound Toxicity - LD50s/LC50s

- Alumina (non-fibrous) (1344-28-1)
- Oral LD50 Rat: >5000 mg/kg
- Silica fume (amorphous) (69012-64-2)
- Oral LD50 Rat: >5000 mg/kg; Dermal LD50 Rabbit: >2000 mg/kg
- Iron oxide (1309-37-1)
- Oral LD50 Rat: >10000 mg/kg
- Zinc oxide (1314-13-2)
- Oral LD50 Rat: >5000 mg/kg
- Ozone (10028-15-6)
- Inhalation LC50 Rat: 4800 ppb/4H
- Nitrogen dioxide (10102-44-0)
- Inhalation LC50 Rat: 88 ppm/4H
- Nitric oxide (10102-43-9)
- Inhalation LC50 Rat: 1068 mg/m³/4H

Ozone (10028-15-6)
   ACGIH A4 - Not Classifiable as a Human Carcinogen (heavy, moderate, or light workloads)
Nitrogen dioxide (10102-44-0)
   ACGIH A4 - Not Classifiable as a Human Carcinogen
Material Safety Data Sheet

Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxxx.x SERIES ALLOYS

ID: 689

C: Formed Compound References

Silica fume (amorphous) (69012-64-2)
  IARC Monograph 68 [1997], Supplement 7 [1987]
Iron oxide (1309-37-1)
  IARC Supplement 7 [1987], Monograph 1 [1972]
Nickel compounds (Not Available)
  IARC Monograph 49 [1990] (evaluated as a group)
Lead, Inorganic compounds (Not Available)
  IARC Monograph 87 [2000]
Chromium (III) compounds (as Cr) (Not Available)
  IARC Monograph 49 [1990] (listed under Chromium and Chromium compounds) Supplement 7 [1987]
Chromium (VI) compounds (certain water insoluble forms) (Not Available)
  IARC Monograph 49 [1990] (evaluated as a group)
Chromium (VI) (18540-29-9)
  IARC Monograph 49 [1990] (evaluated as a group)
Welding fumes (NOC) (Not Available)
  IARC Monograph 49 [1990]

Descriptions of IARC and NTP Classifications

IARC 1: The agent is carcinogenic to humans. There is sufficient evidence that a causal relationship existed between exposure to the agent and human cancer.

IARC 2A: The agent is probably carcinogenic to humans. Generally includes agents for which there is limited evidence of carcinogenicity in humans and sufficient evidence of carcinogenicity in experimental animals.

IARC 2B: The agent is possibly carcinogenic to humans. Generally includes agents for which there is limited evidence in humans and less than sufficient evidence in experimental animals.

IARC 3: The agent is not classifiable as to its carcinogenicity to humans. Generally includes agents for which there is inadequate evidence in humans and inadequate or limited evidence in experimental animals.

IARC 4: The agent is probably not carcinogenic to humans. Generally includes agents for which there is evidence suggesting lack of carcinogenicity in humans and in experimental animals.

NTP K: Known to be a human carcinogen.

NTP RA: Reasonably anticipated to be a human carcinogen.

*** Section 12 - Ecological Information ***

Ecotoxicity

A: General Product Information
No information available for product.

B: Component Analysis - Ecotoxicity - Aquatic Toxicity

Copper (7440-50-8)
  96 Hr LC50 Pimephales promelas: 23 µg/L; 96 Hr LC50 Oncorhynchus mykiss: 13.8 µg/L; 96 Hr LC50 Lepomis macrochirus: 236 µg/L
  72 Hr EC50 Scenedesmus subspicatus: 120 µg/L
  96 Hr EC50 water flea: 10 µg/L; 96 Hr EC50 water flea: 200 µg/L

Iron (7439-89-8)
  96 Hr LC50 Morone saxatilis: 13.6 mg/L [static]

Zinc (7440-66-9)
  96 Hr LC50 Pimephales promelas: 6.4 mg/L
  96 Hr EC50 Selenastrum capricornutum: 30 µg/L
  72 Hr EC50 water flea: 5 µg/L

Lead* (7439-92-1)
  96 Hr LC50 Pimephales promelas: 6.5 mg/L
  48 Hr EC50 water flea: 600 µg/L

Product Name: REMELT INGOT (UNALLOYED ALUMINUM) Pxxxx.x SERIES ALLOYS
ID: 689

Nickel (7440-02-0)
96 Hr LC50 Oncorhynchus mykiss: 31.7 mg/L (adult); 96 Hr LC50 Pimephales promelas: 3.1 mg/L; 96 Hr LC50 Brachydanio rerio: >100 mg/L.
72 Hr EC50 freshwater algae (4 species): 0.1 mg/L; 72 Hr EC50 Selenastrum capricornutum: 0.18 mg/L.
96 Hr EC50 water flea: 510 μg/L.
Environmental Fate: No information available for product.

*** Section 13 - Disposal Considerations ***

Disposal Instructions: Reuse or recycle material whenever possible.
US EPA Waste Number & Descriptions
A: General Product Information
If reuse or recycle is not possible, then characterize in accordance with applicable regulations (40 CFR 261 or state equivalent in the U.S.) prior to disposal. TCLP testing is recommended for chromium and lead.
B: Component Waste Numbers
RCRA waste codes other than described under Section A may apply depending on use of product. Refer to 40 CFR 261 or state equivalent in the U.S.

Canadian TDG Hazard Class & PIN: Not regulated

*** Section 15 - Regulatory Information ***

US Federal Regulations
A: General Product Information
All electrical equipment must be suitable for use in hazardous atmospheres involving aluminum powder in accordance with 29 CFR 1910.307. The National Electrical Code, NFPA 70, contains guidelines for determining the type and design of equipment and installation that will meet this requirement.
In reference to Title VI of the Clean Air Act of 1990, this material does not contain nor was it manufactured using ozone-depleting chemicals.

B: Component Analysis
This material contains one or more of the following chemicals required to be identified under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65) and/or CERCLA (40 CFR 302.4).
Aluminum (7429-90-5)
SARA 313: 1.0 % de minimis concentration (dust or fume only)
Copper (7440-50-8)
SARA 313: 1.0 % de minimis concentration
CERCLA: 5000 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches);
2270 kg final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches)

Material Safety Data Sheet

Product Name: REMELTINGOT (UNALLOYED ALUMINUM) Px xxx.x SERIES ALLOYS

**Zinc (7440-66-6)**
- SARA 313: 1.0 % de minimis concentration (dust or fume only)
- CERCLA: 1000 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches);
- 454 kg final RQ (no reporting of releases of this hazardous substance is required if the diameter of the solid metal released is equal to or exceeds 0.004 inches)

**Manganese (7439-98-5)**
- SARA 313: 1.0 % de minimis concentration
- CERCLA: 5000 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches);
- 2270 kg final RQ (no reporting of releases of this hazardous material is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches)

**Chromium (7440-47-3)**
- CERCLA: 10 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches);
- 4.54 kg final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches)

**Lead* (7439-82-1)**
- CERCLA: 100 lb final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches);
- 45.4 kg final RQ (no reporting of releases of this hazardous substance is required if the diameter of the pieces of the solid metal released is equal to or exceeds 0.004 inches)

SARA 311/312 Physical and Health Hazard Categories:
- Immediate (acute) Health Hazard: Yes, if particulates/fumes generated during processing.
- Delayed (chronic) Health Hazard: Yes, if particulates/fumes generated during processing.
- Fire Hazard: No
- Sudden Release of Pressure: No
- Reactive: Yes, if molten

State Regulations
A: General Product Information
 PENNSYLVANIA "Special Hazardous Substance": Chromium compounds, hexavalent, and Nickel.
 Chemical(s) known to the State of California to cause cancer: Chromium (hexavalent compounds), Lead and lead compounds and Nickel (metallic) and nickel compounds.
 Chemical(s) known to the State of California to cause reproductive/developmental effects: Lead.

B: Component Analysis - State
The following components appear on one or more of the following state hazardous substances lists:

Inventory Information
MITI Inventory: Pure metals are not specifically listed by CAS or MITI number on the MITI Inventory. However, the class of compounds for each of these metals is listed.

*** Section 16 - Other Information ***

MSDS History
Original: March 16, 1990
Supersedes: March 16, 2004
Revised: April 9, 2007

MSDS Status
04/09/07: Reviewed on a periodic basis in accordance with Alcoa policy.
Changes in Sections 1, 2, 3, 4, 5, 7, 8, 11, 12, 13, 14 & 15.
03/16/04: Reviewed on a periodic basis in accordance with Alcoa policy.
Changes in Sections 1, 2, 3, 8, 11, 12 and 15.
