TRUFAST Introduces New Induction Weld Plate for TPO Membrane Applications

TRUFAST is a Trusted Partner for Commercial Roofing Fasteners, Adhesives & Accessories

BRYAN, OH – TRUFAST, a division of Altenloh, Brinck & Co. US, Inc., is pleased to announce the release of its new TPO Induction Weld Plate, part number MPW-TPO-3375. The TRUFAST® Induction Weld (IW) Plates are designed to attach insulation or coverboards to the deck while providing a non-penetrating mechanical attachment of single-ply membranes utilizing an induction welded bond to the TRUFAST IW Plate. Plates have been available for use with PVC membranes, and we are excited to offer the same attachment method for TPO membranes.

TRUFAST IW Plates are approximately 3-3/8" (85.4 mm) diameter, and are approved for use with steel, wood or structural concrete roof decks. The IW Plates are FM 4470 approved.

Induction Weld Plate for TPO Membranes

###

Founded in 1981 in Bryan, Ohio, the TRUFAST Corporation began manufacturing and distributing unique and better performing fastening solutions for the commercial roofing industry. As its product offering grew to include other engineered fastening solutions and accessories, the TRUFAST brand developed a reputation for high-quality products and outstanding customer service. The company was acquired by Altenloh, Brinck & Co. US, Inc., in 2005 and remains a strong brand in the ABC US organization.
